## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, and 7 drawn to methods for propagation of ginseng, camphor ginseng and wild ginseng by tissue culture, classified in class 435, subclass 410.
- II. Claims 6-9, drawn to methods for improving the saponin content of ginseng, camphor ginseng and wild ginseng, classified in class 435, subclass 41.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions in that Invention I is directed to the propagation of ginseng, camphor ginseng and wild ginseng where Invention II is directed to methods of improving the saponin content of ginseng, camphor ginseng, and wild ginseng.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael A. Willis whose telephone number is (703) 305-1679. The examiner can normally be reached on alt. Mondays and Tuesday to Friday (9am-6:30pm).
